Contrappesi modulari in acciaio
Modular steel counterweights
Modulare Gegengewichte aus Stahl

Tutta la qualità e il design di Breda in un nuovo e rivoluzionario portone basculante. Tutto da creare in base al proprio stile!

Swing garantisce funzionalità, sicurezza ed estetica. E libera la voglia di creare, grazie a numerose possibilità di personalizzazione.

Si può scegliere tra i pannelli in acciaio preverniciato finitura stucco, woodgrain o liscio. Per quanto riguarda il colore, ci sono quelli di serie oppure quelli RAL optional, mentre - per chi vuole puntare a un'eleganza senza tempo - ecco le splendide tinte Simil Legno Perfect Touch. Le spallette e la veletta sono disponibili nella stessa finitura del portone e danno una preziosa continuità estetica. Per la sicurezza, invece, ha scelto Breda che ha già previsto il paracadute cavi di serie.

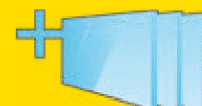

Scegliere non è mai stato così facile e conveniente. E ora puoi goderti il nuovo Swing.

All the BREDA quality and design now in a new and revolutionary "up and over" door. Build everything according to your lifestyle and taste! Swing provides functionality, safety and aesthetics. Release your creativity, thanks to many customization possibilities. You can choose between pre-painted steel panels, stucco, woodgrain or smooth finish. In regards to colours, there are standard ones or optional RAL's, whilst - for those who want to point to a timeless elegance - there are beautiful Wood-like "Perfect Touch" patterns. Jambs and upper stationary panels have the same finish as door and give a valuable aesthetic continuity. For safety, on the other hand, BREDA has decided to provide all doors with cable breakage safety devices. Making a choice has never been so easy and convenient. And now, fully enjoy the new Swing.

BREDA's Qualität und Design jetzt in einem neuen und revolutionären Schwingtor. Entwerfen Sie alles nach ihrem Lebensstil und Geschmack! Swing bietet Funktionalität, Sicherheit und Ästhetik. Lassen Sie Ihren Ideen freien Lauf; dank der vielen Anpassungs-Möglichkeiten können Sie zwischen vorlackierten Stahl-Paneeelen, Stucco, Woodgrain oder Glatte Oberfläche wählen.

In Bezug auf Farben, gibt es Standard oder optionale RAL-Farben zur Wahl, und für diejenigen, die auf zeitlose Eleganz Wert legen, gibt es die wunderschönen „Perfect Touch“ Holz-Dekore. Seitenblenden und Sturz-Verkleidung verfügen über die gleiche Oberfläche des Tores und ermöglichen eine wertvolle ästhetische Kontinuität. Für Sicherheit, andererseits, hat BREDA die Entscheidung getroffen und bietet standesgemäß eine Seilbruchsicherungsvorrichtung an. Nie zuvor war es so einfach und bequem eine Auswahl zu treffen. Gönnen sie sich jetzt den neuen Swing!

Guide a soffitto e molle in coda
Tracks on ceiling and springs at back
Deckenschienen und Federn in der Hinterseite

Concepito da uno studio approfondito del Centro di Ricerca e Sviluppo, Basculino® si pone come un prodotto perfetto sotto tutti i punti di vista. Non una semplice chiusura, ma un prodotto realizzato con pannelli coibentati in grado di garantire una protezione totale dagli agenti atmosferici esterni. Spallette e veletta integrati sono realizzati con la stessa lamiera del portone per avere continuità estetica, con una vasta gamma di colorazioni comprendente anche tinte simil-legno.

Garantiti tutti gli accessori del portone sezionale, in primis la serratura a incasso e le griglie di aerazione o gli oblò.

Therefore our research and development department has created an innovative product. Thus isn't just a standard door; it's a product made of insulated panels that provide more safety and protection of external influences.

The lintel and upper counterframes are provided with the same panel and surface, to maintain a perfect aesthetic product. This is possible thanks to our large range of available colours, which including also five different Wood-like finishes.

All accessories for our sectional door range are also available for Basculino, amongst others: built-in lock, ventilation grilles or inspection windows.

Es ist somit nicht nur ein einfaches Tor; Basculino besteht aus isolierten Paneelen, die eine erhöhte Sicherheit und Schutz vor externen Einflüssen bietet. Sturz- und Seitenblende werden mit derselben Oberfläche geliefert, um ein ästhetisch einwandfreies Produkt zu erhalten und dieses dank unserer breiten Auswahl an Farben sowie Holzdekor Ausführungen. Alle Zubehörteile unserer Sektionaltore sind ebenfalls erhältlich unter anderem das Schloss, Lüftungsgitter und Bullaugen.
